MULTI-CURRENCY STORE

When desiring a multi-currency store, we urge you to consider the reasons you would like multiple currencies. If you are looking to offer multiple currencies as a way to entice purchasers from specific regions, and to offer a comparative price between your currency and another, the Currency Converter Widget will aid in achieving this.

If you are looking to customise the content of your products entirely, and to adjust the price of your products manually for each specific product (ie: not a direct conversion, based on the exchange rate), one of the multilingual plugins above would aid with this. Without the Currency Converter Widget, the customer needs to do their own research on the exchange rate and how much their bank charges to exchange currencies to pay for the order.

If you are looking to customise the content of your products entirely, and to adjust the price of your products manually for each specific product (ie: not a direct conversion, based on the exchange rate), one of the multilingual plugins above would aid with this.
