TAXATION ACCOUNTING

Tax accounting consists of accounting methods that focus on taxes rather than the appearance of public financial statements. Tax accounting is governed by the Internal Revenue Code which dictates the specific rules that companies and individuals must follow when preparing their tax returns.

If you are studying accounting, it is important to learn what a tax accountant does before you decide that this is the occupation you would like to pursue after graduation. Many different titles exist within the field of accounting that you can pursue once you earn your degree and become certified, and selecting the title

Accounting Principals: Financial Accounting Vs Tax Accounting. Business and corporate tax accountants understand the differences between the generally accepted accounting principles (GAAP) used for creating financial statements and the accounting principals used for tax purposes.

The Accounting Tools site is the complete source of information for the accountant. It contains continuing professional education (CPE) courses, accounting and finance books, the Accounting Best Practices podcast, and articles on over a thousand topics.

BANK ACCOUNTING

Bank's Debits and Credits. When you hear your banker say, "I'll credit your checking account," it means the transaction will increase your checking account balance. Conversely, if your bank debits your account (e.g., takes a monthly service charge from your account) your checking account balance decreases.

A bank account can be a deposit account, a credit card account, a current account, or any other type of account offered by a financial institution, and represents the funds that a customer has entrusted to the financial institution and from which the customer can make withdrawals.

This is **the reverse of the meaning of debits and credits** within a business, where a debit balance means that a business has **the reverse of the meaning of debits and credits** within a business, where a debit balance means that a business.
