

Shopping Card Information System

“Eat, Shop, Repeat”

Shopping Card Information

SVM Shopping Card system facilitates the acceptance of electronic payment for online transactions to become increasingly useful due to the widespread use of the internet-based shopping and banking.

Objectives:

To give our customers great convenience and the ability to shop at SVM stores without leaving the comfort of their own home.

Benefits:

Our Shopping Card System is used by customers who have accounts enabled with Internet banking. Instead of entering card details on the purchaser's site, in this system the payment gateway allows users which bank they wish to pay from. Then the user is redirected to the bank's website, where authenticate oneself and then approve the payment. there will also be two-way authentication. Where we, allows merchants to provide their information on our website so that consumers can pay online payments/ from customers / buyers.

It also allows consumers to pay through their bank account. It is seen as being safer than using credit cards, as it considered more safer than using credit cards online is much more difficult for hackers to gain login credentials compared to credit card numbers.

Bank Card Information

S
VM Bank Card Information system facilitates the customers to acquire a bank card through the bank card their clients to perform one or more services that relate to giving the client access to funds, either from the client's bank account or through a credit account. It can also be a smart card. A bank card will usually have the client's name, the issuer's name, and a unique card number printed on it. It will have a magnetic strip on the back enabling various machines to read and access information.

Objectives:

It allows debit cards issued in one country to be used in other countries and allow them instant cash withdrawal.

Benefits:

Depending on the issuing bank and the preferences of the client, this may allow the card to be used as an ATM card, enabling transactions at automatic teller machines; or as debit card, linked to the client's bank account the card can be used independently by on a credit card on POS.

Bank & Shopping Card Packages

This system is set to offer attractive discounts on gift cards countless merchants. Some gift cards are only available as gift codes, which means customers can only use them for online purchases. An ample selection of physical and electronic gift cards, as well as printable electronic certificates that can be used online or in-store, from merchants.

Objectives:

To increase sales and offer discounts to customers which may result in additional sales and brand loyalty.

Benefits:

Customer tends to spend gift card balances, more freely than they spend cash. But for goods return customer can only avail gift cards in stead of cash for future purchases
